

to whom it may concern

I am a truckdriver that has xm radio. I pay for this service and on the the service ot has weather and traffic channels. I use these to alot to find out if i can make a ontime del. to a custermer. I also think that it helps the road constructoin and emergency personal with out them even know so. we can here a better traffic updates and roads that have a accident on them so we can make a alternate route around to stay out of a back up. less traffic for the emergency workers to try to route out of area.and the ones that have XM radio lets other drivers know what is going on and they can make plans olso. XM radio gives more details out at a slower pace and over and over again long before you get to the back up, it also gives you right where it is not just a name of a hwy XM radio give hwy name and state rd # and mile markers please i ask you to let XM keep these channels for me and many other drivers and cars on the hwy and byways.

Respectful
